

BURLINGTON COUNTY HEALTH DEPARTMENT
Preoperational Assessment/Sanitary Survey

“(a) Before a bathing beach opens each year, the owner or operator shall conduct a pre-operational assessment of the bathing beach and the surrounding areas using the Checklist for Public Recreational Bathing Facilities, found at N.J.A.C. 8:26 Appendix E, incorporated herein by reference. This assessment shall include:

1. A review of historical sampling and epidemiological data;
2. A field investigation of the bathing and surrounding areas to identify physical hazards and sources of potential contamination. During this investigation, all changes to the bathing and surrounding areas shall be documented and evaluated;
3. A sampling of waters in the bathing area and in areas of suspected sources of contamination; and
4. All of the items listed on the Department’s Checklist for Public Recreational Bathing Facilities. “ NJAC 8:26

Name of Lake:

Name of Surveyor:

Municipality:

Date/Time of Survey:

- Copy of maps attached (GIS /Tax maps)** **Copy of water analyses reports attached**
(for areas of potential contamination, if Applicable)

POTENTIAL POLLUTION SOURCES/PHYSICAL HAZARDS ASSESSMENT

- Litter (note location and type)

-
- Wood
 Septic systems in area
 Sewage treatment plant in area
 Storm water runoff:
Slope towards lake: steep flat gradual
 Wildlife/domestic animal waste on ground: none some heavy
 Outfall /Discharge pipes (If so, plot on GIS map)
 Evidence of Erosion
 Physical Hazards (trees stumps, etc.) List physical hazards:

WILD LIFE

- Birds/geese
 Dead Animals
 Dead Fish
Other

HARMFUL ALGAL BLOOM CONDITIONS (circle all that apply)

- Not observed
 Observed: Spilled paint, pea soup, large green dots, green streaks parallel to shoreline
