

Recycling Bottle Caps with Aveda

The Burlington County Regional Recycling Program asks you to remove the caps from your plastic bottles before recycling. We are not able to process them for recycling at this time but Aveda can help.

Aveda salons and stores are partnering with schools and building a new recycling program for plastic bottle caps.

Aveda sends the caps to a recycler who will grind them up and mold them into new plastic caps for Aveda products.

Caps included are any plastic “twist on” bottle caps from common household items – water & soda bottles, shampoo/conditioner, laundry detergent/ fabric softener, prescription bottle caps.

Caps NOT included are metal caps and “snap fit” plastic caps from margarine, yogurt & cottage cheese containers.

Questions? Email: capcollection@aveda.com or call 1-877-AVEDA09.
