## What is the Registry?

- The Burlington County Sheriff's Office has joined with the County Office on Aging and the Burlington County Police Chief's Association to coordinate crime prevention and other services for senior citizens. As part of this initiative, we have instituted a PERSONS AT-RISK REGISTRY which is a tool for law enforcement officers to identify persons with Alzheimer's or other conditions that may cause them to wander from their home and be unable to return safely on their own.

## How does the information get into the Registry?

- We are asking Health Care Providers and Care Givers for help in making this **free program** available to any At-Risk person that will benefit from it. If you answered yes to any of the questions in this brochure, the person you care about may be at-risk. If you would like a registration packet or have more questions concerning this free program, please call our **Community Outreach Unit** at the phone number below.

## How will the Registry work?

- Through this program, family members who wish to use this free service would provide a photograph and pertinent information on the individual who is at-risk. In the event this person is either found or reported missing, this information will be used by law enforcement personnel to identify and return the person quickly and safely to their home. This information will be available to local, county and state police departments 24 hours a day in the event an identity of a person is needed.

## Who will see this information?

- All information supplied through the Persons At-Risk Registry will be kept strictly **confidential** and not be used for any other purpose. The information will only be available to Law Enforcement Personnel in the course of identifying an individual who is missing or lost.
