Title:
Burlington County Bicycle Map

Map Explanation:

The bike route and bike map work are being funded by a 3 year grant from the Delaware Regional Planning Commission's (DVRPC's) Supportive Regional Highway Planning Program (SHRPP) for \$40,000 per year. In the first 2 years, the funds were used to hire Cross County Connections (CCC) to prepare a bike master plan with general goals of creating a bikeway network that connects town centers, regional bikeways and destinations for recreation and transportation, increasing the safety of roadways for bicyclists, and making bicycling a convenient transportation option. As part of developing the plan, several public meetings were held in order to obtain public input. In the 3rd year, FY2015, the funds are being used to pay a cartographer, who specializes in bike maps, to create a map showing existing bike facilities as well as other roads that may currently be suitable for biking and may act as connectors to routes or destinations.
