**Presented by:** Noah Berkowitz

**Organization:** Rowan University

**Title:**

## **Robbery Hotspots in Philadelphia**

### **Map Explanation:**

This map titled Robbery Hotspots in Philadelphia was made in a class called Geographic Information Systems in the spring semester of 2016 at Rowan University by Noah Berkowitz. The professor of the class was Mr. Farrell. This map showcases robbery hotspots (clusters) in Philadelphia with confidence levels using data from Esri, HERE, DeLorme, MapmyIndia, City of Philadelphia, and the Philadelphia Police Department. The data is from 2014. This lab familiarized students like myself with the model builder and python's role in GIS maps and work.
