

# 11

**Presented by:** Matt Lashendock

**Organization:** Burlington County

Department of Information Technology, GIS Section

**Title:**

**Impacts from Hurricane Matthew: 28 September thru 9 October 2016**

**Map Explanation:**

This poster displays various damage reports along the path of the North Atlantic Hurricane Matthew system in the Fall of 2016. Imagery is shown in conjunction with GIS data reflecting the course and strength of the storm at various time intervals. Sustained wind speeds and windswath areas can be compared with population centers, including those areas where the residents are particularly vulnerable to catastrophic circumstances.
